DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: FSOURCE C4 PAD, FSOURCE IO Cell (it should be noted that the specification discloses only FSOURCE C4 and FSOURCE IO Cell), [0...up to 63], [0...3] and [0...1] in Fig. 1; Locations and FSOURCE IO CELL in Fig. 2; FUSE Control and FSOURCE IO Cell in Fig. 3; FUSE Control, FSOURCE IO Cell and Added to solve placement restriction in Fig. 4; FUSE Control, FSOURCE IO Cell and Minimal Solution to Solve Placement Problem in Fig. 5; 5. Create on new FSOURCE C4 and Step 5 in Fig. 6. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the features as recited

in claims 3-5, 9-11, 15-17 and 19-21; a fuse domain in parallel as recited in line 1 of claim 13 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities:

The description of Figs. 1-4 should be placed under Detailed Description since they are not disclosed as Prior Art embodiments.

Appropriate correction is required.

Claim Objections

4. Claims 1 and 19 are objected to because of the following informalities:

Claim 1, no antecedent basis for "the flexibility of placement" (line 1).

Claim 19, the connective relationship between a circuit and said functional elements (line 3) is not defined.

Appropriate correction is required.

Allowable Subject Matter

5. Claims 1-21 are allowed.

6. The following is an examiner's statement of reasons for allowance:

The microchip integrated circuit and the method for increasing the flexibility of placement of primary fuse macros on a microchip as recited in claims 1-21 have not been found in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
